PROFESSIONAL SUMMARY

Java Full Stack Developer with experience in building scalable backend services and full-stack web applications. Skilled in **Spring Boot, REST API development, React.js, and database systems**. Strong foundation in Data Structures, OOP, DBMS, and system design with focus on performance, security, and maintainable code.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C
Frontend: React.js, HTML5, CSS3, Responsive UI, Component-Based Architecture
Backend: Spring Boot, Node.js, Express.js, Flask, RESTful APIs, MVC Architecture, JWT Authentication, Middleware
Frameworks: Spring Boot, Spring Security, Hibernate (JPA)
Databases: MySQL, MongoDB (Query Optimization, Indexing, Normalization)
Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD
Tools: Git, GitHub, Postman, JSON, Agile, SDLC, Debugging, Unit Testing
Core Concepts: Data Structures, OOP, DBMS, API Design, System Design

EDUCATION

B.E. Information Science and Engineering 2023–2026
Dayananda Sagar College of Engineering, Bengaluru
CGPA: 7.08/10 — SGPA (7th Sem): 8.14

Diploma in Engineering 2020–2023
SECAB Polytechnic College, Vijayapura
Aggregate: 90%

PROJECTS

Smart Budget Management System (React.js, Node.js, MongoDB)

- Developed a full-stack application with scalable backend services and responsive frontend UI
- Designed RESTful APIs using MVC architecture enabling secure CRUD operations
- Implemented JWT-based authentication, middleware validation, and role-based access control
- Integrated frontend and backend ensuring seamless data flow and state management
- Optimized database queries improving response time by 30% under concurrent load

Disease Prediction System (Python, Flask, ML)

- Built machine learning system predicting 773 diseases using ensemble models on 246K+ dataset
- Developed REST API with sub-1 second latency and structured JSON response handling
- Designed modular backend architecture enabling scalable deployment

Calendar Event Management System (Java, MySQL)

- Developed backend-driven event management system with filtering, pagination, and optimized SQL queries
- Designed normalized relational schema ensuring high performance and data integrity

IoT Smart Wheelchair – Patent Granted (2025)

- Developed real-time obstacle detection and Bluetooth-controlled mobility system
- Integrated hardware and software modules ensuring low-latency navigation

ACHIEVEMENTS

- Granted Government of India Patent (2025) for **IoT-Based Smart Wheelchair for Intelligent Mobility Assistance**

CERTIFICATIONS

Cloud Computing (NPTEL) — Web Development (Infosys Springboard) — Java Programming (Simplilearn)
